

The Diamond you know, the Diamond you trust since 1903

For more than 120 years, Diamond Power has delivered innovation, reliability and trusted expertise to our clients across the world.

As we move into the next phase of our journey, we boldly embrace our long-held commitment to our **people**, our **plants**, and the ongoing evolution of our **product** line to meet the ever-changing needs of our customers, and we are confident that our future as part of the ANDRITZ team is bright!

DIAMOND POWER PEOPLE...PLANT...and PRODUCTS
LOOK TO THE FUTURE

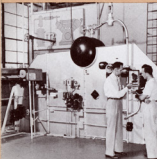

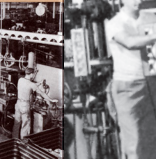

TODAY AND TOMORROW
Always to move the modern Diamond plant at Lancaster, Ohio. In addition to the expansion of manufacturing facilities, the other building is being enlarged to provide for internal engineering, service, and advanced data processing facilities. ... all to support our present performance and to meet the future growth pattern of the power and process industries.

ALL THIS... And History Too
History of a firm is of importance only if it is an inspiration and foundation for achievement now and in the future. No company can hope to survive its customers in their best advantage if it spends its time planning in the past. The Diamond Power plant of the future, like we are the most concerned with today's performance and tomorrow's planning.

OPERATION FUTURE
Here, we are conducting extensive research on sheet cleaning ... a new concept of cleaning for certain detergents, cleaning surfaces. Sheet cleaning shows much promise in several early installations.

DIAMOND POWER means

People	Plant	Products
Of these three, people are most important. All industrial progress depends upon people with specialized training and long experience ... working under optimum conditions.	People accomplish most when they have the best in research, development and manufacturing facilities. Diamond provides the most advanced facilities available.	Our continuous program for product improvement and manufacturing inherent assures the most advanced equipment for better cleaning and more best indicating.
		
REALISTIC TRAINING We make every effort to provide our personnel with training that is realistic and thorough. This time-honored belief in the Diamond industry is an example of the methods used. In the various types of Diamond Blowers used in the same way as in service ... may be studied thoroughly and consistently.	MODERN FACILITIES Our plant and equipment are thoroughly modern ... the most advanced production methods are employed. Modern use is made of materials handling and other time-saving equipment. The picture illustrates part of the automatic sheet and liner production line, showing carbon testing and assembly operations.
